

(a) Monte Carlo: $N = 2048$ dardos aleatorios

$$\hat{\pi} = 4 \frac{N_{\text{dentro}}}{N} = 4 \cdot \frac{1629}{2048} \approx 3.182$$

(b) Quasi-Monte Carlo: $N = 2048$ dardos Sobol

$$\hat{\pi} = 4 \frac{N_{\text{dentro}}}{N} = 4 \cdot \frac{1613}{2048} \approx 3.150$$
